

Introduction to Python and Data Analytics Challenge Exercise

Load and Run the Notebook

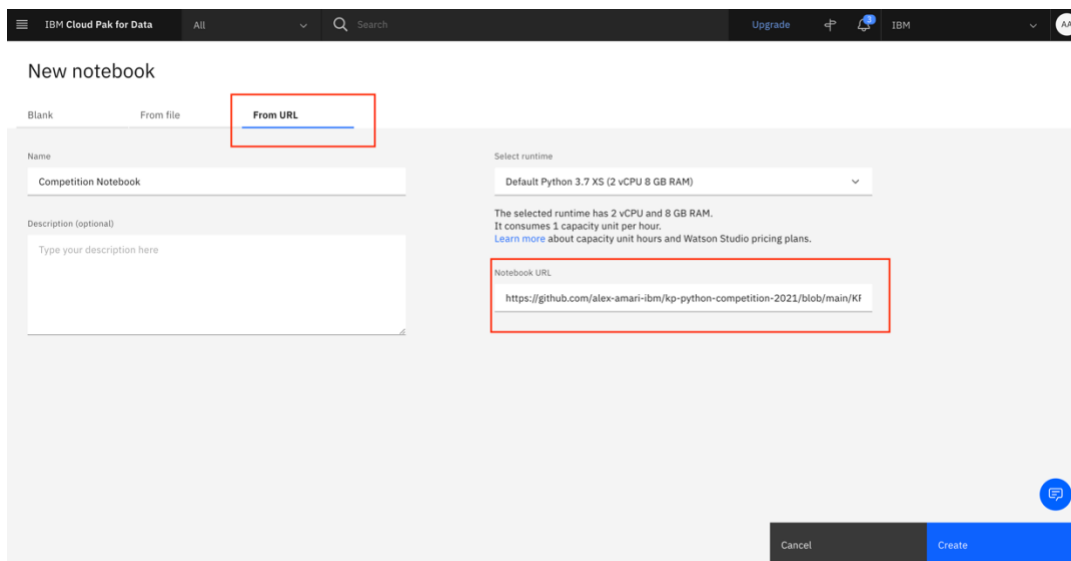

- Ensure you have logged in to IBM Cloud at <https://cloud.ibm.com/login>
- Visit <https://dataplatform.cloud.ibm.com/home>

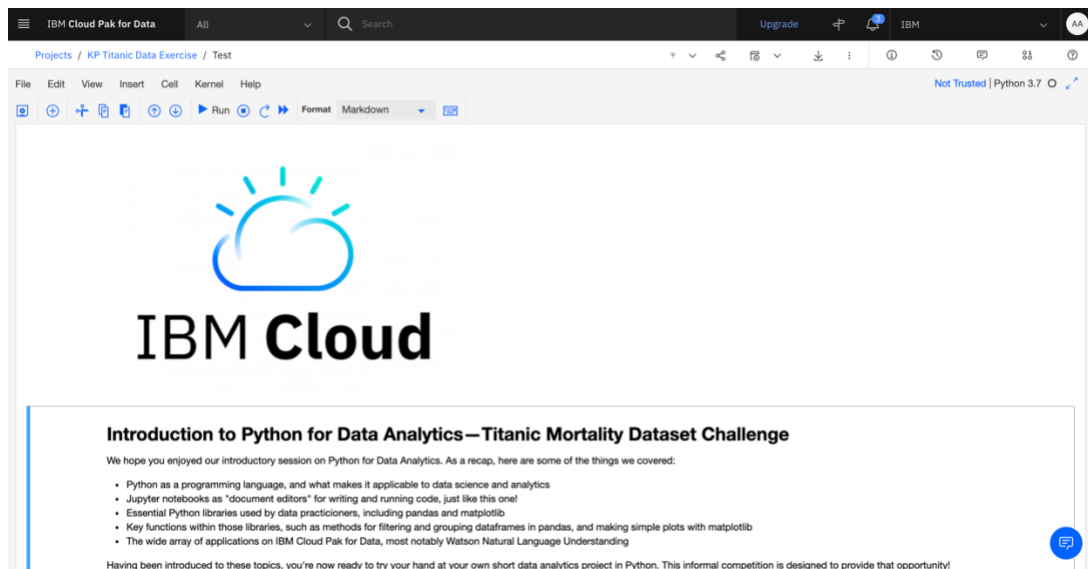

- Under Overview > Recent Projects, navigate to the project you created for our Intro workshop. You may also create a new project if you wish.
- Select “Add to project +” and select Notebook

- Next select “From URL” and in the URL prompt input this link: <https://github.com/alex-amari-ibm/kp-python-competition-2021/blob/main/KP%20Titanic%20Dataset%20Competition%20Notebook.ipynb>

- Give your notebook a title—something like “IBM/KP Competition Notebook,” then hit Create on the bottom right.
- Once Watson Studio has completed instantiating the notebook, you should see this:

You're now ready to get started in the competition notebook. Just be sure to read the instructions there before starting on your code. Good luck and have fun 😊!

If you have any issues with setup, shoot me an email at alexamari@ibm.com
